

Part C & Part D Reporting – How we support you

To achieve the best results in the annual audit, CODY[®] helps Part C and Part D plans prepare for CMS Part C & D reporting. Preparation is critical to achieve accurate CMS reporting and a successful Data Validation Audit.

- CODY[®] provides Pre-Assessment consulting services for any plan that isn't utilizing CODY[®] currently as their Data Validation Auditor.
- Since the Part C & D Data Validation share many attributes and data sources with other audits, we leverage our knowledge of CMS regulations and auditing experience of Medicare Advantage plans to ensure your organization is ready prior to the annual CMS Data Validation cycle.
- We offer a range of services from full census review, including compliance at the individual data-element record level, methodology/programming review to source-data review.
- Before you report to CMS in February and enter the Validation Audit time period that begins on April 1st, CODY's SMEs will help you:
 - Ensure your organization's data collection, processing, and data aggregation meet the CMS reporting standards and technical specifications for the year
 - Identify any issues with processes, procedures, and information systems used to store, compile, and report Part C and Part D data
 - P&Ps have all the required data capture, storage, retrieval, and security information documented - and the procedures are fully implemented within the health plan
 - Develop action plans to correct deficiencies in internal data, systems, and reporting processes prior to required reporting to CMS and the annual audit
 - Identify and prioritize areas of risk that may not align with CMS Medicare Advantage and/or Prescription Drug Benefit Programs and remediate them prior to the DV audit
- CODY[®] has decades of experience implementing and supporting Part C & D reporting requirements, as well as the required supporting documentation and data retention.

Since 2006, CODY[®] has bridged the knowledge gap between health plans serving the Medicare market and the government agencies where they contract. We understand the complexity of working with government healthcare programs. Our team has led the industry for decades—and we have the tools and resources to serve you.
